

CONCRETE ANCHORING AND ACCESSORIES

HOLE CLEANING BRUSH

DEWALT steel adhesive brushes are suitable for hand or machine cleaning, and are available in standard threaded rod and rebar diameters. These are used as part of the anchoring system, to remove dust from the drilled hole, ensuring maximum performance is achieved from the chemical anchor.

Material Number	Description
BR8-10MM-PWR	Brush for 8-10MM Hole Size
BR10-14MM-PWR	Brush for 10-14MM Hole Size
BR16-28MM-PWR	Brush for 16-28MM Hole Size

MIXER NOZZLE EXTENSIONS

Extension nozzles are used ensure the bottom of the hole is reached when installing adhesive in deep embedment depths. Can be cut down to preferred length to ensure minimal wastage.

Material Number	Description
MNEXT-PWR	Mixer Nozzle Extensions (200MM)
AEXTN-PWR	Adhesive Extensions Nozzle (1.0MT)

PISTON PLUG

DEWALT piston plugs are used in deep hole anchoring. They prevent the formation of air bubbles inside the hole during dispensing the adhesive.

Material Number	Description
APP20-PWR	Piston Plug 20mm Drill Dia x 12
APP24-PWR	Piston Plug 24mm Drill Dia x 11
APP28-PWR	Piston Plug 28mm Drill Dia x 11
APP40-PWR	Piston Plug 40mm Drill Dia x 11

STANDARD MIXING NOZZLE

8482-PWR

Static mixing nozzles are used to ensure complete and proper mixing of the adhesive components. Suits AC100-PRO, AC100E & EA70-PRO.

PURE EPOXY MIXING NOZZLE & EXTENSION

PFPN-PWR

Static mixing nozzles are used to ensure complete and proper mixing of the adhesive components. Suits PURE500+

MIXING NOZZLE - 19 ELEMENT

DFC1640550

Static mixing nozzles are used to ensure complete and proper mixing of the adhesive components. Suits PURE500+

HYBRID ACRYLIC MIXING NOZZLE

AC200NZN-PWR

Static mixing nozzles are used to ensure complete and proper mixing of the adhesive components. 10 pcs - Suits AC200+
