

OPEN TYPE BLIND RIVET

This Rivet is an open type blind rivet, which has a low profile assembly. It is a general purpose rivet for all applications.

FINISH	HEAD
All Aluminium	Dome
Aluminium/ Steel	Dome/ Csk.
All Steel	Dome/ Csk.
Stainless/ Steel	Dome
All Stainless	Dome/ Csk.
Monel Steel	Dome/ Csk.
Copper	Dome

SEALED TYPE BLIND RIVET

The sealed type blind rivet is where the rivet mandrel is encapsulated in the rivet body and set in the same way as an open type blind rivet. This rivet is used in applications where water or pressure tightness is required, such as gas/water tanks, roofing.

FINISH	HEAD
Aluminium Steel	Dome
	Countersunk
304 Stainless Steel	Dome
Copper	Dome

LARGE FLANGE BLIND RIVET

Large Flange rivets have twice the under head bearing surface of comparable dome head rivets and are designed for applications where soft or brittle materials must be assembled to a rigid backing material.

FINISH	HEAD
Aluminium/ Steel	Dome
	Peel
All Steel	Dome

MULTIGRIP TYPE BLIND RIVET

The multigrip rivet allows a much wider grip range of material thickness than a standard open type rivet and provides excellent performance in oversized holes. Can be used in the car components, capping and construction industry.

FINISH	HEAD
Aluminium/ Steel	Dome

PEEL TYPE BLIND RIVET

When a peel blind rivet mandrel is set, it cuts the rivet body into four equal legs, giving maximum load bearing area. Can be used in soft materials like plastic and in the PVC industry.

FINISH	HEAD
Aluminium/ Steel	Dome
	Dome Large Flange

RIVET NUTS

The Macsim Rivet Nut is a one piece, internally threaded rivet that allows components to be fastened to sheet metal. The low torque design offers a wide grip range, and a high resistance to vibration and spin out.

TYPE	FINISH	SIZE
Reduced Head	Zinc Plated	M4 - M10
Reduced Head - Ribbed	Zinc Plated 304 Stainless Steel	M4 - M10 M6 - M10
Flanged	Zinc Plated	M4 - M10
Flanged - Ribbed	Zinc Plated 304 Stainless Steel	M4 - M10 M6 - M10
