## PLIERS SELF ADJUSTING, CLAMPS

**Lockjaw™ pliers** provide the versatility of a standard plier plus more. Traditional pliers require two hands to adjust the jaw open. Lockjaw™ self adjusting capability makes jobs faster and easier.

**Lockjaw™ clamps** provide intelligent designs with user friendly characteristics, making them the choice for industrial workers, professionals and DIY users.

**A. Curved Jaw:** Lockjaw curved jaw pliers are innovative, heavy duty and time saving tools, built for professionals.

**B. Straight Jaw:** Lockjaw straight jaw pliers are innovative, heavy duty and time saving tools, built for professionals

**C. Needle Nose:** Long heavy-duty gripping nose provides excellent control and reach for work in confined spaces

**D. C-Clamp:** Wide opening jaws provide greater versatility in clamping a variety of shapes.

**Swivel C-Clamp:** Wide opening jaws with swivel pads which allow parallel clamping while preventing denting or gouging on delicate surfaces

**E. Extended Reach Clamp:** Similar to the C-Clamp, these pliers offer a deeper throat for extra reach.

**Swivel Extended Reach Clamp:** Swivel pads allow parallel clamping while preventing denting or gouging on delicate surfaces

**F. Welding Clamp:** For use in welding applications or for holding awkward shapes in place. Forked jaws provide greater visibility.

**G. Table C-Clamp:** Ideal for clamping objects to tables or work surfaces while drilling, cutting, grinding or other workshop tasks. Can be fixed to a machine T-Slot table for moving into the ideal position or securely bolted.

**H. Sheet Metal Welding Clamp:** Ideal for securing flat sheets of metal for welding or other work. Spreads the clamping pressure to avoid damage on soft materials. Clamping action can be customized to the material thickness by adjusting the bolt. ^Not self-adjusting automatic

**I. One Hand Aluminium Clamp:** Heavy duty design for industrial and professional application. Aluminium alloy clamp body to withstand great clamp pressure. Maximum clamping force up to 350kgs

**J. One Hand Dual Clamp:** Changeable pads between V-grooved or flat TPR grip pads for clamping different objects without marking. Nylon composite clamp body with strengthened carbon steel bar. Maximum clamping force up to 200kgs

**K. Ratchet Clamp:** Patented ratchet mechanism with easy release trigger. V-grooved swivelling pads. Nylon composite body

**L. Parallel Clamp:** Light weight smooth carbon steel bar and aluminium body. Easy conversion into spreader without additional tools. Large TPR grip pads. Maximum clamping force up to 400kgs
