### DESTRUCTOR **WOOD & NAILS** CUTTING

Ideal for: Softwood, hardwood and wood with nails. Strengthened and reinforced tooth design guards against fracture from nails. Available in 5TPI in 150, 230 and 300mm OAL.

### DESTRUCTOR **METAL** CUTTING

Ideal for: Metal, wood with nails and plastic. Tall and strong blade ensures fast, straight cuts. Available in a range of lengths and 10, 14 and 18 TPI for a wide range of metal thicknesses.

### DESTRUCTOR **METAL & TIMBER** CUTTING

Ideal for: Wood with nails, metal, non-ferrous metal, aluminium, cast iron and pipes. Available in 8TPI in 150, 230 and 300mm OAL.

### RIPPA **TIMBER** CUTTING

Ideal for: Hardwoods, softwoods, plywood, chipboard and synthetic materials. Aggressive precision ground and set teeth for fast cutting without clogging. Available in 5TPI in 150, 230 and 300mm OAL.

## THE AX™ WITH CARBIDE TEETH – HEAVY DUTY BLADE

**SAWZALL™**

Since the launch of SAWZALL™ back in 1951, MILWAUKEE® continues to deliver game-changing blade solutions with the introduction of THE AX™ with Carbide Teeth SAWZALL™ Blade.

Engineered to deliver long life in the toughest applications, these new blades will deliver up to 30x longer life and 2x faster cutting compared to standard bi-metal blades. When it comes to extreme cutting applications and versatility in a wide range of materials, Carbide tooth technology provides optimum durability. MILWAUKEE's bi-metal Ax SAWZALL™ Blades set the standard for wood cutting and have been the market leader ever since.

Made in the USA, the introduction of Carbide teeth to THE AX™ SAWZALL™ Blades take cutting to the next level. Similar to the original bi-metal Ax, the new Ax with Carbide Teeth SAWZALL™ Blade features a NAIL GUARD tooth design to prevent nails from fracturing the blade's teeth upon impact and an aggressive 5TPI design to deliver fast cuts. While ordinary plunge tooth designs can bounce or skate along the work surface, the FANG TIP design bites into the wood on first contact to make the cut virtually effortless. A pair of unique, fang-like teeth and an extra-large gullet deliver plunge cuts with ease. The combination of these features will allow users to cut through a wide range of standard and abrasive materials without sacrificing the life of their blade.

As the leader in cordless technology, MILWAUKEE® engineered these blades for cordless efficiency. By optimising the geometry of each and every carbide tooth, MILWAUKEE® is able to deliver a cutting solution that provides more cuts per charge. With the launch of THE AX™ with Carbide Teeth SAWZALL™ Blades, MILWAUKEE® again shows continued commitment to delivering innovative accessory solutions to save time and increase productivity on the job site.
