

BOTTOM MOUNT SLIDING GATE TRACK WHEELS

These bottom mount track wheels are easy to install and mount to the bottom of the gate frame, allowing it to slide along the track.

- Zinc plated, stainless steel, and stainless/nylon track wheels available

RECESSED GATE TRACK WHEELS

These gate wheels offer a low profile option and require a cut out section in the gate frame to install.

- Zinc plated, stainless steel, and stainless/nylon track wheels available

NYLON GATE GUIDE ROLLERS

Manufactured from UV resistant nylon our superior gate guide rollers offer a low friction, low wear solution. Guide rollers are used to support the gate frame during opening and closing.

END CATCH AND GATE STOPPER

A gate stopper and end catch stop the gate from extending too far during opening or closing. The gate end catch provides a secure resting point for the gate when it is closed. At the other end, the gate stopper prevents the gate from moving further than the track during opening.

SLIDING GATE TRACK

Galvanised sliding gate track to suit track wheels. There are many benefits to using bolt down track instead of the concrete in alternative. Besides the ease of installation on existing concrete driveways, it is a simple process to replace a section of the track if damage was to occur in future.

- 1m and 3m lengths available

HANGING GATE AND DOOR HARDWARE

Easy to install and operate, Richmond supply a range of hanging hardware to suit all manner of heavy duty commercial applications, without interfering with the ground or walkways. Our range includes: Hanging roller channels, heavy-duty 2 & 4 wheel roller sets, wall & roof mount support brackets, end stoppers, floor mount door guides, track joiners, and end stops.
