

Product:

SECTION 1 – STATEMENT OF CHEMICAL PRODUCT AND COMPANY IDENTIFICATION			
Trade Name:	CRETE-OFF		
SUPPLIER:	Construction Supply Specia	alists	
ADDRESS:	17 Lakeside Drive Broadme	eadows VIC 3047	
TELEPHONE:	+61 3 93574228	FAX:	+61 3 93574229
AH EMERGENCY TELEPHONE:	13 1126 in Australia	ABN:	67 100 073 087
Substance:	Liquid	Product Use:	Concrete Remover
Creation Date:	June 2018	Revision Date:	June 2023
Product Code:			

SECTION 2 – HAZARDS IDENTIFICATION		
Classification of the substance or mixture		
Poisons Schedule	Not scheduled	
Dangerous Goods	Not classified as Dangerous Goods	
GHS Classification	Serious Eye Damage/Irritation Category 1	
	Skin Irritation Category 2	
Label elements		
GHS label pictograms		
Signal word	DANGER	
Hazard statement(s)		
H318	Causes serious eye damage.	
H315	Causes skin irritation.	
Precautionary statement(s): General		
P102	Keep out of reach of children.	
P103	Read label before use.	
Precautionary statement(s): Prevention		
P280	Wear eye protection/face protection and protective gloves.	
P264	Wash hands thoroughly after handling.	
Precautionary statement(s): Response		
P305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.	
P310	Immediately call a POISON CENTER or doctor/physician.	
P302 + P352	IF ON SKIN: Wash with plenty of soap and water.	
P332 + P313	If skin irritation occurs: Get medical advice/attention.	
P362	Take off contaminated clothing and wash before reuse.	
P321	Specific treatment (see First Aid Measures on Safety Data Sheet).	
Precautionary statement(s): Storage		

Date of Issue: June 2018 Page 1 of Total 8
--

Product:

	None allocated	
Precautionary statement(s): Disposal		
	None allocated	
Note		
IMPORTANT	This SDS and the Hazard Classifications contained therein, only apply to the product in its concentrated form, as supplied.	
	When diluted to 1:5 or greater they no longer apply.	
	However, good hygiene and housekeeping practices should be adhered to.	

SECTION 3 – COMPOSITION AND INFORMATION ON INGREDIENTS			
Ingredients:		CAS Number:	Proportion:
Glycolic Acid		79-14-1	10 – 30% w/w
Ingredients determined to be non-			
hazardous		various	100%
NOTE:	Ingredients determined not to be hazardous are present in concentrations that do not exceed the relevant cut-off concentrations as found from NOHSC publication "List of Designated Hazardous Substances" or have been found NOT to meet the criteria of a hazardous substance as defined in the NOHSC publication "Approved Criteria for Classifying Hazardous Substances", or have been found NOT to meet the criteria of a dangerous substance as defined in the GLOBALLY HARMONIZED SYSTEM OF CLASSIFICATION AND LABELLING OF CHEMICALS (GHS), 4th edition United Nations 2011. Listed ingredients may be below the cut-off concentrations for classification as hazardous, but are listed for information purposes and for additive effects		

SECTION 4 – FIRST AID MEA	ISURES
Scheduled Poisons	Poisons Information Centre in each Australian State capital city or in Christchurch, New Zealand
	can provide additional assistance for scheduled poisons. (Phone Australia 131126 or New
	Zealand 0800 764 766).
First Aid Facilities	
Required	Eye wash station. Normal washroom facilities.
Inhalation	Remove victim to fresh air away from exposure. Obtain medical attention if symptoms occur.
Skin contact	Wash skin with plenty of water. Seek medical advice (e.g. doctor) if irritation, burning or redness
	develops.
Eye contact	If in eyes, hold eyelids apart and flush the eyes continuously with running water. Remove
	contact lenses. Continue flushing until advised to stop by the Poisons Information Centre or a
	doctor, or for at least 15 minutes. Immediately call a POISON CENTER or doctor/physician.
Ingestion	Do NOT induce vomiting. Do NOT attempt to give anything by mouth to an unconscious person.
	Rinse mouth thoroughly with water immediately. Give water to drink. If vomiting occurs, give
	further water to achieve effective dilution. Seek medical advice (e.g. doctor).
Advice to Doctor	Treat symptomatically. All treatments should be based on observed signs and symptoms of
	distress of the patient. Poisons Information Centre in each Australian State capital city or in
	Christchurch, New Zealand can provide additional assistance for scheduled poisons.

SECTION 5 – FIRE FIGHTING MEASURES		
Fire and Explosion	Non flammable liquid. However, on evaporation of the aqueous component, the residual	
Hazards	material may burn.	

Date of Issue: June 2018	Page 2 of Total 8

Product:

# **CRETE-OFF**

Extinguishing Media	Use an extinguishing media suitable for surrounding fires. Use carbon dioxide (CO2) fire
	extinguisher, water fog or alcohol resistant foam or fine water spray.
Fire Fighting	Keep containers exposed to extreme heat cool with water spray. Fire fighters to wear self-
	contained breathing apparatus if risk of exposure to products of combustion or decomposition.
Flash Point	Non combustible

#### SECTION 6 – ACCIDENTAL RELEASE MEASURES

Emergency Procedures	Shut off engine and electrical equipment and leave off.
	<ul> <li>Move people from immediate area; keep upwind.</li> </ul>
	Stop leak if safe to do so.
	<ul> <li>Send messenger to notify fire brigade and police.</li> </ul>
	<ul> <li>Tell them location, material quantity, emergency contact.</li> </ul>
	<ul> <li>Indicate condition of vehicle and damage or injuries observed.</li> </ul>
	Warn other traffic.
<b>Occupational Release</b>	Minor spills do not normally need any special clean-up measures.
	In the event of a major spill, prevent spillage from entering drains or water courses. Wear
	appropriate protective equipment as in section 8 below to prevent skin and eye contamination.
	Spilt material may result in a slip hazard and should be absorbed into dry, inert material (e.g.
	sand, earth or vermiculite), which then can be put into appropriately labelled drums for disposal
	by an approved agent according to local conditions. Residual deposits will remain slippery. Wash
	area down with excess water. Neutralise with soda ash if required. If contamination of sewers
	or waterways has occurred advise the local emergency services. In the event of a large spillage
	notify the local environment protection authority or emergency services.

SECTION 7 – HANDLING AND STORAGE		
Handling	As with any chemical, avoid excessive personal contact. Wear protective clothing when risk of exposure occurs. Avoid contact with incompatible materials. When handling, DO NOT eat, drink or smoke. Keep containers closed at all times. Avoid physical damage to containers. Always wash hands with water after handling. Work clothes should be laundered. Launder contaminated clothing before re-use.	
Storage	Store in a cool, dry, place with good ventilation. Avoid storing in aluminium and light alloy containers. Keep containers closed at all times – check regularly for leaks	

SECTION 8 – EXPOSURE CONTROLS AND PERSONAL PROTECTION		
Exposure Limits	National Occupational Exposure Limits, as published by National Occupational Health & Safety	
	Commission:	
	Time-weighted Average (TWA):	
	None established for product.	
	Short Term Exposure Limit (STEL):	
	None established for product.	
Ventilation	Use with adequate ventilation.	
Personal Protective	Use good occupational work practice. The use of protective clothing and equipment depends	
Equipment	upon the degree and nature of exposure. The following protective equipment should be	
	available;	

Product:

# **CRETE-OFF**

Eye Protection	Safety glasses with full face shield should be used for handling concentrate in quantity, cleaning up spills, decanting, etc. Eye protection devices should conform to relevant regulations. Eye protection should conform with Australian/New Zealand Standard AS/NZS 1337 - Eye Protectors for Industrial Applications.
Hand Protection	Wear gloves of impervious material such as butyl rubber, natural latex, neoprene, PVC and nitrile – to handle in quantity, clean up spills, decanting, etc. Final choice of appropriate gloves will vary according to individual circumstances. i.e. methods of handling or according to risk assessments undertaken. Occupational protective gloves should conform to relevant regulations. Reference should be made to AS/NZS 2161.1: Occupational protective gloves - Selection, use and maintenance.
Body Protection	Suitable protective workwear, e.g. rubber or plastic apron, sleeves, boots and cotton overalls buttoned at neck and wrist are recommended. Chemical resistant apron is recommended where large quantities are handled.
Respirator	Generally not required for typical applications as per label directions with adequate ventilation. Where high contaminant spray mist or vapour levels exist, ie, approaching the exposure limit, the following additional equipment is required: For short elevated exposures, eg, spillages:- Appropriate organic vapour cartridge respirator as per the requirements of AS/NZS 1715 and AS/NZS 1716 (Respiratory protective devices). For prolonged exposure and confined spaces:- full face air supplied or self contained breathing apparatus (if vapour levels exceed the Exposure Limit by more than ten times, air supplied apparatus should be used).

#### SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

Physical State	Liquid	Colour	Colourless
Odour	Characteristic odour	Specific Gravity	1.07 @ 25 ºC
Boiling Point	Approximately 100 °C	Freezing Point	Approximately 0 °C
Vapour Pressure	Not available	Vapour Density	Not available
Flash Point	Not flammable	Flammable Limits	None
Water Solubility	Miscible in all proportions	рН	1.5 -2.0
Volatile Organic		Coefficient of Water/Oil	
Compounds (VOC)	Not available	Distribution	Not available
Viscosity	Not available	Odour Threshold	Not available
Evaporation Rate	Not available	Per Cent Volatile	>85% v/v

SECTION 10 – STABILITY AND REACTIVITY		
Reactivity	Stable at normal temperatures and pressure.	
Chemical stability	Stable under normal ambient and anticipated storage and handling conditions of	
	temperature and pressure.	
Conditions to avoid	Avoid contact with heat or heat sources.	
Incompatible materials	None known.	
Hazardous	Product can decompose on combustion to form Carbon Monoxide, Carbon Dioxide, and other	
decomposition products	possibly toxic gases and vapours.	
Hazardous Reactions	None known.	

#### SECTION 11 – TOXICOLOGICAL INFORMATION POTENTIAL HEALTH EFFECTS

Product:

# **CRETE-OFF**

No adverse health effects expected if the product is handled in accordance with this Safety Data Sheet and the product label. Symptoms or effects that may arise if the product is mishandled and overexposure occurs are: Inhaled The vapour is discomforting. Inhalation of vapour may aggravate a pre-existing respiratory condition such as asthma, bronchitis, emphysema. Ingestion Ingestion may result in nausea, abdominal irritation, pain and vomiting. Ingestion of lowmolecular organic acid solutions may produce spontaneous haemorrhaging, production of blood clots, gastrointestinal damage and narrowing of the oesophagus and stomach entry. Skin Contact This material can cause inflammation of the skin on contact in some persons. The material may accentuate any pre-existing dermatitis condition. Entry into the blood-stream, through, for example, cuts, abrasions or lesions, may produce systemic injury with harmful effects. Examine the skin prior to the use of the material and ensure that any external damage is suitably protected. This material can cause eye irritation and damage in some persons. Solutions of low-molecular Eye weight organic acids cause pain and injury to the eyes. Chronic Repeated or prolonged exposure to corrosives may result in the erosion of teeth, inflammatory and ulcerative changes in the mouth and necrosis (rarely) of the jaw. Bronchial irritation, with cough, and frequent attacks of bronchial pneumonia may ensue. **Toxicology Information** Not toxic, based on ingredients. Oral LD50 (calculated) : >2000 mg/kg For ingredient: Glycolic acid Inhalation (rat) LC50: 7.1E-6 mg/L/4hr Oral (rat) LD50: 1950 mg/kg **Carcinogen Status** NOHSC No significant ingredient is classified as carcinogenic by NOHSC. NTP No significant ingredient is classified as carcinogenic by NTP. IARC No significant ingredient is classified as carcinogenic by IARC. Not expected to be a respiratory sensitizer. **Respiratory sensitisation Skin Sensitisation** Not expected to be a skin sensitizer. Germ cell mutagenicity Not considered to be a mutagenic hazard. **Reproductive Toxicity** Not considered to be toxic to reproduction. STOT-single exposure Not expected to cause toxicity to a specific target organ. STOT-repeated exposure Not expected to cause toxicity to a specific target organ. Aspiration Hazard Not expected to be an aspiration hazard.

SECTION 12 - ECOLOGICAL IN	FORMATION						
General	No single ing	No single ingredient (over 1%) recognised as environmental pollutant. Product miscible in all					
	proportions	with water. AS WITH AN	IY CHE	EMICAL PRODUCT, DO N	IOT DISCHARGE INT	O DRAINS,	
	WATERWAYS	S, SEWER OR ENVIRONN	1ENT.	Inform local authorities	if this occurs.		
Toxicity of Ingredients	Ingredient	Endpoint Test Duration	n (hr)	Species	Value	Source	
	glycolic acid	LC50 96		Fish	1522.08702mg/L	3	
	glycolic acid	EC50 96	Alga	e or other aquatic plant	s 29.67093mg/L	3	
	glycolic acid	EC0 24	Alga	e or other aquatic plant	s >1000mg/L	1	
Legend:	Extracted from 2	1. IUCLID Toxicity Data 2. Euro	pe ECH	IA Registered Substances - Ec	otoxicological Informatio	on - Aquatic

	Data 8. Vendor	Data					
Aquatic Toxicity							

Product:

CRETE OFF (at use dilution)	Acute Aquatic Toxicity NOT HAZARDOUS – Not harmful to aquatic life.	
Persistence and	Riodogradable, based on ingredients	
degradability	מוטעבצו מעמטוב, שמצבע טון וווצו בעובוונג.	
Bio accumulative potential	No bioaccumulation is expected.	
Mobility in soil	Due to its physico-chemical characteristics, highly mobile in the environment and will partition	
	to the aquatic compartment.	
Other adverse effects	Not available	
<b>Environmental Protection</b>	Do not discharge this material into waterways.	

SECTION 13 – DISPOSAL CON	SIDERATIO	NS									
Product and Packaging	Dispose	of	contents/container	to	chemical	landfill.	Consult	local	or	regional	waste
Disposal	managen	nent	t authority for furthe	r de	tails.						

SECTION 14 – TRANSPORT INFO	ORMATION
Labels Required	
ADG	None allocated
Marine Pollutant	No
HAZCHEM	None allocated
Land Transport (ADG)	
UN number	None allocated
Packing group	None allocated
UN proper shipping name	None allocated
Environmental hazard	None allocated
class(es)	
Transport hazard class(es)	None allocated

Product:

SECTION 15 – REGULATORY INFORMATION		
Labeling Details		
GHS Classification	azardous	
SUSMP	Not scheduled	
ADG Code	Not regulated	
AICS	All ingredients present on AICS.	

SECTION 16 – OTHER INFORMA	ATION					
Issue Date	6 <sup>th</sup> June 2018					
Version Number	V 2.0					
Abbreviations and acronyms	ADG Code: Australian Code for the Transport of Dangerous Goods by Road and Rail.					
	AICS: Australian Inventory of Chemical Substances.					
	CAS Number: Chemical Abstracts Service Registry Number.					
	GHS: Globally Harmonized System of Classification and Labelling of Chemicals					
	HAZCHEM: An emergency action code of numbers and letters which gives information to					
	emergency services.					
	HSIS: Hazardous Substances Information System					
	IARC: International Agency for Research on Cancer.					
	NOHSC: National Occupational Health and Safety Commission.					
	NTP: National Toxicology Program (USA).					
	SDS: Safety Data Sheet					
	STEL: Short Term Exposure Limit.					
	SUSMP: Standard for the Uniform Scheduling of Medicines and Poisons.					
	TWA: Time Weighted Average.					
	UN Number: United Nations Number.					
Literature references	Preparation of Safety Data Sheets for Hazardous Chemicals – Code of Practice (Safe Work					
	Australia)					
	GHS Hazardous Chemical Information List (Safe Work Australia)					
	Guidance on the Classification of Hazardous Chemicals under the WHS Regulations.					
	Global Harmonized System of Classification and Labelling of Chemicals (GHS)					
	"Australian Exposure Standards". Safework Australia					
	Australian Code For The Transport Of Dangerous Goods By Road And Rail					
	Standard for the Uniform Scheduling of Medicines and Poisons					
	Material Safety Data Sheets – individual raw materials – Suppliers					
	HSIS – Hazardous Substance Information System – National Safe Work Australia Data Base.					
	HCIS – Hazardous Chemical Information System – National Safe Work Australia Data Base.					
Risk assessments	This SDS is a tool to communicate hazards which can assist you in creating relevant risk					
	assessments for your workplace. There are many variables in determining whether a					
	things as the amount used, frequency of use, engineering controls, effectiveness of safety					

Product:

	training and many more considerations.		
Disclaimer	This MSDS summarizes at the date of issue our best knowledge of the health and safety hazard information of this product, and in particular how to safely handle and use this product in the workplace. Since the supplier cannot anticipate or control the conditions under which the product may be used, each user must, prior to usage, review this MSDS in the context of how the user intends to handle and use the product in the workplace. If clarification or further information is needed to ensure that an appropriate assessment can be made, the user should contact this supplier.		
Note	Safety Data Sheets are updated frequently. Please ensure that you have a current copy.
